EDUCATION

Baruch College/CUNY, Zicklin School of Business **New York, NY**
Bachelor of Business Administration in Finance; Minor in Communications *Anticipated Graduation: December 2026*
GPA: 3.7/4.00 **Honors:** Zicklin Honors Program, Dean's List (All Terms)
Relevant Coursework: Corporate Finance, Financial Reporting Analysis, Advanced Investment Analysis, Statistical Analysis in Economics & Finance, Honors Case Studies in Business

PROFESSIONAL EXPERIENCE

EDGE TERMINAL – PREDICTION MARKET ANALYTICS PLATFORM **New York, NY**
Start Up Founder *March 2026 – August 2026*

- Built and launched an analytics platform for Kalshi and Polymarket traders that scores mispricing between market-implied probabilities and independent model estimates, pulling live pricing and volume from both exchange APIs across politics, macro, and sports
- Validated the model live by deploying a small test allocation of personal capital across three flagged mispricings, returning 156% over two months, measured through a performance layer tracking win rate, realized P&L, and edge captured versus fair odds

MURRAY HILL GROUP (PRIVATE EQUITY & VENTURE CAPITAL) **New York, NY**
Investment Analyst *June 2025 – August 2025*

- Performed independent due diligence on a private nuclear generation company, analyzing projected cash flows, cost structure, and contract-backed revenue visibility, informing a decision to defer the $10M investment until technology and contract milestones de-risked the entry
- Sized a ~$18B annual DoD diesel spend addressable by microreactor generation, mapping the US power regulatory environment, Project Pele, customer pipeline, and offtake contract structures to set the revenue ceiling
- Authored investment memos on the target and its closest competitor, benchmarking cost efficiency, capital intensity, and technology readiness to stress-test the recommendation
- Created a regulatory timeline diagram mapping approval milestones to first generation, giving senior leadership one page to judge how far the company stood from revenue

ODP AI SOLUTIONS **New York, NY**
Developer *June 2024 – Present*

- Launched a proprietary AI chatbot for a sports coaching business, cutting owner email volume from 70 to 15 per month and capturing 100+ leads into a centralized database
- Engineered a custom knowledge base aggregating business information across four social platforms, enabling the chatbot to answer client and prospect questions with zero staff involvement

PROJECTS

PORTFOLIO MANAGEMENT – LONG/SHORT MULTI-ASSET FUND *March 2026 – May 2026*

- Head of Trading for a $100M simulated long/short multi-asset fund with 30% leverage, growing the book to $141.1M (+8.5%) through Fed policy shifts and Middle East geopolitical uncertainty, monitoring risk through VaR, standard deviation, and cross-holding correlation
- Pitched a long Exxon and Chevron position on Strait of Hormuz supply risk during US-Iran escalation, sizing on asymmetry with limited downside to baseline valuation

EQUITY RESEARCH – INTEL (INTC) *May 2025*

- Selected EV/EBITDA as the appropriate methodology after negative earnings ruled out P/E and negative free cash flow made a DCF unreliable, forecasting five years of revenue and EBITDA to arrive at a $22.24/share target price
- Assessed Intel's liquidity position and capital intensity, identifying Intel Foundry as the swing factor while weighing geopolitical risk and US reliance on foreign chip manufacturing

RESEARCH PAPER – FEDERAL STUDENT LOANS & HOMEOWNERSHIP *December 2025*

- Analyzed 300,000+ rows of federal loan disbursement data across 7,500+ institutions, standardizing the raw dataset for analysis and building regressions that linked unsubsidized lending to lower homeownership rates and subsidized lending to higher

COLOSSEUM SOLANA HACKATHON – CHAINSIGHT *October 2025*

- Co-founded ChainSight, a verified Chrome extension rated 4.5 stars that detects Solana and Ethereum token addresses on Twitter and pulls live liquidity, volume, market cap, and contract age from decentralized exchanges for instant due diligence

CERTIFICATIONS

M&A Simulation | UBS via AmplifyMe, Ranked #3 *November 2025*
Securities Industry Essentials (SIE) | FINRA *June 2025*
Bloomberg Market Concepts | Bloomberg *April 2025*
Sales & Trading Simulation | Morgan Stanley, UBS via AmplifyMe, Ranked #1 *October 2024*

SKILLS

- **Technical:** Financial Modeling, Valuation, Comparable Company Analysis, Cash Flow Modeling, Capital Structure Analysis
- **Platforms:** Bloomberg Terminal, Capital IQ, Excel (Pivot Tables), PowerPoint
- **Data & Analytics:** Python, SQL, Tableau, Regression Analysis, Statistical Modeling
- **AI:** Claude Code, Codex, API Integration

ADDITIONAL INFORMATION

- **Languages:** Kyrgyz (Native), Russian (Fluent)
- **Interests:** Chess, European Football, Crypto Markets, Film, Video Editing
